

Autogage systeem

Electronic automated gage for mitre saws

The autogage system (positioner) will allow the operator to make error-free movements.

The system can be fit on almost every mitre saw or single cut off saw. Standard is the positioning size of 1700 mm, but different sizes are possible. Easy user interface with a 4x40 char.LCD display and keyboard. Drive system uses a motor with a rotary encoder for controlling every movement of the system. Cut sizes can be entered in millimeters or inches, and the software can be operated in different languages

Specifications:

Positioning speed	1 m/s
Accuracy	0.1 mm
Voltage	115V and 230V/
50 Hz	
Power	300 W

Price € 4670,00 excluding brackets
