

Foam/board strips with bevelled sides

In France it is a tradition of many years to make a deep bevel with bevelled strips on the back of your mat/mount. In some countries we call this a French mat.

With foam/board strips you can make your own French mat in a few minutes.

The strips are already bevelled on both sides (60 degrees for the foam and 45 degrees for the board) So if you make a mistake you can always use the other side. Cut the foam strips with your mat-cutter or the special foam biseaux cutter. The board strips can be cut with moulding chopper or with a 45 degrees mat-cutter.

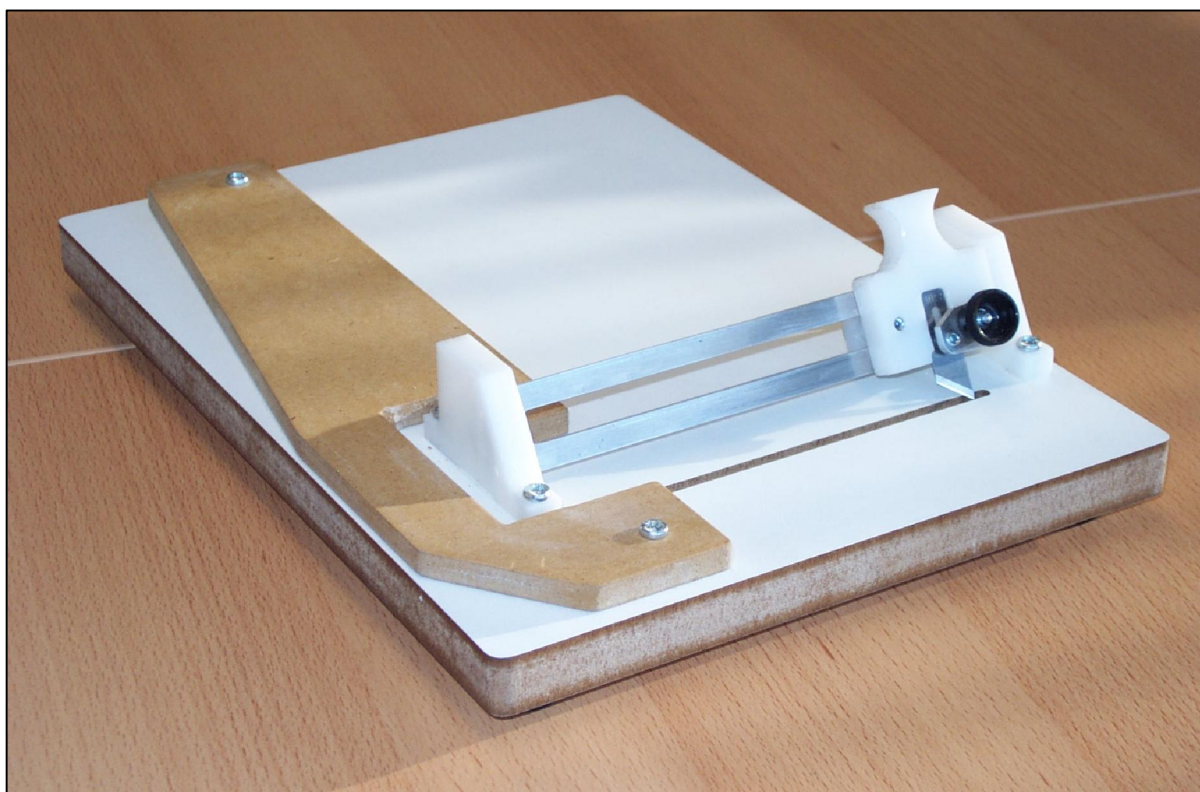

Foam biseaux

Natural: 25 boardstrips 5mm in box with instruction. Both sides bevelled 60 degrees.

Colours: 20 strips in box with instruction. Both sides bevelled 60 degrees and one side applied with mat decoration tape.
